

Coal GP Discounted Fees:

1. No Fee submittals:

- Removal of outfalls in reclamation status- attach documentation with submittal
- Transfers- after issuance by DNR, attach documentation with submittal
- Submittal of 2 year RPA Sample
- Removal of CROs from permit
- Updating permitted outfall coordinates for DMRs

Currently outfall removals are submitted using a “Coal No Discharge Certification” form found at: <http://dep.ky.gov/formslibrary/Documents/KYG04PermitPage.pdf>
If you use the Coal GP eNOI for any of these modifications, a filing fee will be required. We are currently upgrading the eNOI to cover all KPDES permit modifications.

2. Submittals Requiring Fees:

- Outfall status change from Active to Reclamation- attach one year of DMRs to submittal
- Reduction of Toxicity monitoring frequency and/or species request
- Removal of sanitary discharge type- attach documentation with submittal

These modifications require using the current eNOI as a “Change to Existing Coverage”. The permittee should clearly indicate the changes to be made in the field “Describe the activities associated with the coverage being sought” to speed up the review process. This proration is not extended to Renewal of coverages, only to modifications. Submittals will require the \$260 filing fee, and the remainder fee will be prorated on a yearly basis at the time of submittal.

Submittal date	Remainder Fee
10/1/2014-9/30/2015	\$1040
10/1/2015-9/30/2016	\$780
10/1/2016-9/30/2017	\$520
10/1/2017-9/30/2018	\$260
10/1/2018-9/30/2019	\$0
